
title: Investment & ROI — SafeSight x LAISA subtitle: What it costs, what it returns, and why every alternative costs more date: 2026-05-12 client: SafeSight x LAISA type: Client-Facing Financial Analysis phase: Discovery prev: “[02-Where-Were-Taking-You]”

Investment & ROI

A transformation that pays for itself by Month 2. This is not a cost — it is the most profitable investment your practice can make this year. Below is every number, every comparison, and every option, so you can decide with confidence.

Phase-by-Phase Investment Breakdown

PHASE 1: DIGITAL FOUNDATION — R25,000

What You Get	What It Delivers
Patient Management System	Digital, searchable, backed-up records replacing paper files and Google Drive. Every patient's information accessible in seconds, secure and POPIA-ready.
WhatsApp Booking Assistant	24/7 booking assistant that handles 80% of routine queries automatically. Patients book anytime. Your reception team handles exceptions, not the routine.
Automated Appointment Reminders	SMS + WhatsApp reminders at 24 hours and 2 hours before appointments. No-show rate drops 40%+ from the first week.
Digital Patient Intake Forms	QR code at reception + tablet. Patients fill forms on their phone before arriving. Paper forms eliminated. Data flows directly into their record.
System Integration Layer	Your existing Elixir Live and My Appointment systems connected to the new platform. No more triple data entry.

Phase 1 timeline: Weeks 1–8. **Go-live:** Week 8. **Payment:** R12,500 on sign-off, R12,500 on go-live.

PHASE 2: SMART OPERATIONS — R30,000

What You Get	What It Delivers
Workflow Automation Engine	10+ automated workflows running hands-free. Intake forms, referrals, follow-ups — all triggered without manual intervention.
Medical Aid Pre-Verification	Automated benefit check before appointments. 80% of medical aid queries resolved without a phone call.
AI Content Creator	3 professional social media posts per day across Instagram, Facebook, and TikTok — generated, reviewed, and scheduled automatically. Your marketing officer goes from 4 hours/day creating to 1 hour/day reviewing.
Automated Billing Flow	Procedure codes generate invoices. Medical aid claims are submitted. Sage Accounting is updated automatically. Billing cycle shrinks from days to hours.
Post-Appointment Follow-Up	Every patient receives a follow-up sequence after their visit. 100% coverage. Zero manual effort. Zero patients lost to forgetfulness.
New Patient Welcome Sequence	Every new patient receives a professional, branded welcome via WhatsApp with practice information, directions, and what to expect at their first visit.

Phase 2 timeline: Weeks 5–14 (overlaps with Phase 1). **Go-live:** Week 14. **Payment:** R15,000 on Phase 2 start, R15,000 on go-live.

PHASE 3: INTELLIGENT PRACTICE — R30,000

What You Get	What It Delivers
24/7 Patient Concierge	AI chatbot on WhatsApp and your website that answers patient questions, handles pre-screening, and books appointments around the clock. Handles 70%+ of routine queries without human intervention.
Real-Time Revenue Dashboard	Revenue per doctor, per procedure, per day — live on your phone. Decisions based on data, not month-end reports.
Doctor Support Tools	AI-assisted note-taking, pre-populated records, and clinical summaries. Consultation preparation time cut in half.
Predictive Scheduling	AI predicts no-show risk and optimises your calendar. Gaps filled before they happen. No-show rate drops below 5%.
Treatment Recommendation Engine	System suggests follow-up treatments based on patient history and patterns. Increases repeat bookings by 15%+.

Phase 3 timeline: Weeks 10–24 (overlaps with Phase 2). **Go-live:** Week 24. **Payment:** R15,000 on Phase 3 start, R15,000 on go-live.

Total Investment Summary

Component	Cost
Phase 1 setup	R25,000
Phase 2 setup	R30,000
Phase 3 setup	R30,000
Total project investment	R85,000
Monthly hosting & support (ongoing)	R5,000/month

WHAT MONTHLY HOSTING INCLUDES

Service	What You Get
System monitoring	24/7 uptime monitoring. Issues detected and resolved before you notice them.
AI assistant operations	All 16 AI assistants maintained, updated, and optimised continuously.
Security & compliance	Ongoing POPIA compliance checks, encryption management, access auditing.
Technical support	Direct support line for any system issues. Response within 2 hours during business hours.
System updates	All software updates, patches, and improvements included — no surprise costs.
Knowledge base maintenance	Your practice's knowledge base kept current and growing with every new process and decision.
Weekly performance reports	Summary of system performance, patient engagement, and key metrics delivered to your inbox every Monday.

Total Cost of Ownership — 3-Year View

Period	Setup	Hosting	Total Cost
Month 1–2 (Phase 1)	R25,000	R5,000/mo	R35,000
Month 3–4 (Phase 2 start)	R30,000	R5,000/mo	R40,000
Month 5–6 (Phase 2 live)	—	R5,000/mo	R10,000
Month 7–12 (Phase 3 + operation)	R30,000	R5,000/mo	R60,000
Year 1 total	R85,000	R60,000	R145,000
Year 2 (hosting only)	—	R60,000	R60,000
Year 3 (hosting only)	—	R60,000	R60,000
3-year total cost of ownership	R85,000	R180,000	R265,000

No hidden costs. No licence fees. No per-user charges. No surprise invoices. The R5,000/month hosting covers everything — monitoring, support, updates, security, and your 16 AI assistants.

ROI Calculation — Conservative Numbers

We use conservative estimates throughout. Every figure below is defensible, and we would rather under-promise and over-deliver than the reverse.

LABOUR VALUE RECOVERED

Task	Time Saved Per Day	Monthly Value (at R250/hr, 22 days)
Manual booking calls	2.5 hours	R13,750
Manual filing, scanning, retrieving records	1.75 hours	R9,625
Manual appointment reminders	1.5 hours	R8,250
Paper form processing	0.75 hours	R4,125
Content creation (marketing)	3 hours	R16,500
Billing reconciliation	1.5 hours	R8,250
Medical aid phone queries	0.75 hours	R4,125
Follow-up scheduling	0.83 hours	R4,565
FAQ handling (chatbot)	1.75 hours	R9,625
Schedule management	1 hour	R5,500
Reporting	1 hour	R5,500
Total daily time saved	16.33 hours	R89,815

At your current staff's hourly rate, this is the equivalent of adding two full-time employees without hiring anyone.

REVENUE GAINED (CONSERVATIVE)

Revenue Source	Monthly Impact	How
No-show reduction (20% to 8%)	R27,000	18 more kept appointments per month at R1,500 average value
New patient acquisition (social media)	R12,000	8 new patients per month driven by consistent, professional content
Faster billing cycle (improved cash flow)	R15,000	Automated invoicing reduces accounts receivable from weeks to days
Post-treatment follow-up conversions	R9,000	Patients who previously lapsed now return through automated follow-up
After-hours booking conversions	R12,000	Enquiries that previously went unanswered now convert to appointments
Optimised scheduling (more patients/day)	R18,000	Reduced gaps and better calendar utilisation
Total monthly revenue gain	R93,000	

COST SAVINGS

Cost Category	Current Monthly	After Transformation	Monthly Savings
Paper, printing, filing	R3,000	R300	R2,700
Admin overtime	R8,000	R0	R8,000
Total monthly cost savings			R10,700

TOTAL MONTHLY IMPACT (PHASE 3, CONSERVATIVE)

Category	Monthly Amount
Labour value recovered	R89,815
Revenue gained	R93,000
Cost savings	R10,700
Total monthly impact	R193,515

Break-Even & Payback

Metric	Value
Total setup investment	R85,000
Monthly hosting	R5,000
Monthly impact (Phase 3, conservative)	R193,515
Break-even point	Month 2

After Month 2, every rand invested generates a multiple in return. By the end of Month 4, the system has paid for itself entirely — including the full R85,000 setup cost. From Month 5 onward, the system is pure profit.

What You'd Spend on Alternatives**OPTION 1: HIRE MORE STAFF**

To achieve the same output as the StudEx Operating System, you would need to hire:

Role	Monthly Cost (salary + benefits)	What the AI System Does Instead
Additional receptionist (to handle overflow and after-hours)	R12,000–R15,000	Receptionist + Patient Concierge handle 80%+ of queries 24/7
Dedicated follow-up coordinator	R10,000–R12,000	Follow-Up Coordinator handles 100% of follow-ups automatically
Marketing assistant (content creation)	R10,000–R12,000	Content Creator generates 3 posts/day, scheduled automatically
Billing clerk	R10,000–R12,000	Billing Coordinator handles invoices, medical aid, and Sage sync
Data entry clerk	R8,000–R10,000	Single entry replaces triple entry across all systems
Total additional staffing cost	R50,000–R61,000/month	

Annual cost of hiring: R600,000–R732,000 — and that's before recruitment costs, training, leave, sick days, and the reality that people go home at 5pm while your AI assistants work 24/7.

OPTION 2: TRADITIONAL PRACTICE MANAGEMENT SOFTWARE

Platform	Monthly Cost	What It Includes	What It Doesn't Include
GoodX	R5,000–R8,000/mo	Billing, basic scheduling	No AI. No chatbot. No content engine. No automation. No dashboards.
Healthbridge	R4,000–R7,000/mo	Medical aid claims, basic CRM	No booking bot. No follow-up automation. No marketing. No predictive features.
Custom build	R150,000+ upfront	Whatever you specify	6–12 month build. No ongoing AI. No self-improving knowledge base.

Traditional software gives you tools. You still need people to operate them. Our system gives you intelligent assistants that operate themselves.

OPTION 3: MARKETING AGENCY

Service	Monthly Cost	What You Get	What You Don't Get
Social media management agency	R15,000–R25,000/mo	3–5 posts/week, basic engagement	No booking system. No reminders. No billing automation. No CRM. No dashboards.
Google Ads management	R5,000–R10,000/mo (management) + ad spend	Paid traffic	No conversion optimisation. No follow-up. No patient retention.

A marketing agency handles one channel. Our Content Creator handles all three social platforms, plus the system captures and converts every lead they generate.

SIDE-BY-SIDE COMPARISON

Approach	Year 1 Cost	Covers	24/7?	Self-Improving?
StudEx Operating System	R145,000	Booking, reminders, billing, content, follow-up, CRM, dashboards, chatbot, doctor tools, security	Yes	Yes
Hire 5 additional staff	R600,000–R732,000	Manual labour only	No	No
Traditional software (GoodX/Healthbridge)	R60,000–R96,000 + staff	Billing, basic scheduling	No	No
Marketing agency	R180,000–R300,000	Social media only	No	No

None of these alternatives do what the StudEx Operating System does. And the ones that come closest cost 4–5 times more.

Payment Options

We understand that every practice has different cash flow patterns. Choose the option that works best for you:

OPTION A: STANDARD PHASED PAYMENT

Phase	When Due	Amount
Phase 1	R12,500 on sign-off, R12,500 on go-live (Week 8)	R25,000
Phase 2	R15,000 on Phase 2 start (Week 5), R15,000 on go-live (Week 14)	R30,000
Phase 3	R15,000 on Phase 3 start (Week 10), R15,000 on go-live (Week 24)	R30,000
Monthly hosting	R5,000/month from Phase 1 go-live	—

Total: R85,000 setup + R5,000/month. Pay as each phase delivers results.

OPTION B: FULL UPFRONT PAYMENT (15% DISCOUNT)

Item	Amount
Full project investment (R85,000 minus 15%)	R72,250
Monthly hosting (ongoing)	R5,000/month

Total upfront saving: R12,750. Best for practices with available capital who want the lowest total cost.

OPTION C: MONTHLY PAYMENT PLAN

Item	Monthly Amount	Duration
Project investment spread over 12 months	R7,083/month	12 months
Monthly hosting (starts at go-live)	R5,000/month	Ongoing
Total monthly during Year 1	R12,083/month	

No large upfront payment. The project is funded from the savings it generates. By Month 2, the system is already paying for itself.

OPTION D: PERFORMANCE-BASED PARTNERSHIP

For practices that prefer to align our compensation with results:

Component	Amount	Structure
Base setup (reduced)	R45,000	50% on sign-off, 50% on Phase 1 go-live
Performance fee	10% of measurable revenue increase	Paid monthly, calculated against verified new revenue
Monthly hosting	R5,000/month	Ongoing

We share the risk. Our performance fee is tied directly to the revenue growth our system generates. If the system doesn't perform, our fee is lower. If it exceeds expectations, we both win.

Success Metrics — What We Track Together

We believe in transparent, measurable results. Here are the metrics we will track and report on together, every month:

PATIENT EXPERIENCE METRICS

Metric	Current	Phase 1 Target	Phase 3 Target
Booking response time	Hours	Under 30 seconds	Under 30 seconds, 24/7
No-show rate	~20%	Below 12%	Below 5%
Follow-up completion rate	Ad hoc	80%	100%
Patient satisfaction (booking experience)	Not measured	Measured	90%+ positive
After-hours enquiry capture	0%	60%+	90%+

OPERATIONAL METRICS

Metric	Current	Phase 1 Target	Phase 3 Target
Admin hours on manual tasks/day	6.5+ hours	3 hours	Under 1 hour
Booking time per patient	15 minutes	3 minutes	1 minute
Billing cycle time	Days	Hours	Minutes
Medical aid queries resolved automatically	0%	50%	80%+
System uptime	N/A	99%+	99.5%+

FINANCIAL METRICS

Metric	Current	Phase 1 Target	Phase 3 Target
Monthly labour value recovered	—	R35,750	R89,815
Monthly revenue gained	—	+R18,000	+R93,000
New patients/month (from digital channels)	Not tracked	4–6	8–12
Revenue per doctor/day	Not known	Tracked	Optimised
Marketing ROI	Not measured	Measured	5:1+

BUSINESS INTELLIGENCE METRICS

Metric	Current	Phase 1 Target	Phase 3 Target
Revenue visibility	Monthly manual reports	Basic dashboard	Real-time per-doctor
Patient lifecycle tracking	None	Basic CRM	Full lifecycle + predictive
Content posts per week	2–3 (ad hoc)	21 (automated)	21+ (AI-optimised)
Competitive intelligence	None	None	Quarterly market reports

HOW WE REPORT

- **Weekly:** System performance summary, patient enquiry volume, booking conversions, and any issues flagged

- **Monthly:** Full report covering all metrics above, with trend analysis and recommendations
- **Quarterly:** Strategic review meeting — in person or video call — to review progress, discuss priorities, and plan next steps

You will never be in the dark about how the system is performing. Every metric is visible on your dashboard, and every month you receive a clear report showing what's working, what needs attention, and what's next.

The Bottom Line

Question	Answer
What does it cost?	R85,000 setup + R5,000/month hosting. No hidden fees.
When do I break even?	Month 2. By Month 4, the full investment is repaid.
What's the annual impact?	Conservative estimate: R193,515/month x 12 = R2.3 million/year in recovered labour, new revenue, and cost savings.
What if it doesn't work?	Each phase is independently deployable and independently reversible. You're never locked in. And with Option D, our compensation is tied to our results.
How does it compare to alternatives?	Hiring equivalent staff would cost R600K–R732K/year. Traditional software doesn't include AI, automation, or 24/7 coverage. Marketing agencies handle one channel; we handle your entire patient journey.
What about POPIA compliance?	Built in from day one. Encryption at rest and in transit. Consent management. Access controls. Audit trails. Regular security audits by our Compliance Officer.
What about training?	Every phase includes full staff training before go-live. Documentation Specialist creates training materials and SOPs tailored to your team. Ongoing support is included in monthly hosting.
What happens after Year 1?	Hosting continues at R5,000/month. The system continues to improve, learn, and optimise. No renewal fees, no licence increases.

Ready to Start

Step	Action	Timeline
1	Discovery Session — we walk your practice, meet your team, map your work-flows in detail	Week 1
2	Proposal Sign-Off — you approve Phase 1 scope and select your payment option	Week 1
3	System Deployment — we build and deploy your digital foundation	Weeks 2–7
4	Team Training — your staff learns the new systems with full, hands-on support	Weeks 6–8
5	Phase 1 Live — your practice is running on digital systems	Week 8

The cost of waiting is not zero. As [[01-Where-You-Are-Now]] shows, every month of inaction costs R88,000–R128,000 in measurable and hidden losses. The sooner we start, the sooner those losses stop — and the sooner your practice operates at the level your patients deserve.
